SUMMARY

Software Engineering undergraduate and full-stack developer with hands-on experience delivering live client projects using React, React Native and Supabase. Skilled at turning client requirements into reliable, user-friendly web and mobile applications, and at integrating AI capabilities such as image classification and smart recommendations. Combines a product-focused mindset with strong UX and design sensibility, and is committed to continuous learning and delivering high-quality work.

TECHNICAL SKILLS

- Programming Languages: JavaScript, TypeScript, C#
- Frontend Development: React.js, React Native, Tailwind CSS, NativeWind, Shadcn/ui, Bootstrap, GSAP
- Backend & APIs: Node.js, Express.js, REST APIs, JWT Authentication, Clerk
- Databases & Backend Services: MongoDB, MySQL, Supabase
- DevOps & Deployment: Git, GitHub, Netlify, Vercel
- Development & Project Tools: Figma, WebStorm, Postman, Google Antigravity, ClickUp, ProjectLibre, Notion

PROJECTS

- **WasteXchange | Full Stack Developer (MERN Stack)**

Developed a full-stack, mobile-responsive e-commerce web application for industrial waste exchange. The platform includes AI image classification, automatic buyer recommendations with notifications sent to the relevant buyers, a carbon dashboard that shows environmental savings, real-time bidirectional messaging, and payment handling. Designed and implemented complete CRUD operations for product, order, and user management, secured the application with JWT-based authentication and authorization and password hashing, and added per-user request rate limiting on the back end.
GitHub: https://github.com/maanithadev/WasteXchange

- **MLA Foods | Full Stack and Mobile App Developer**

Built a mobile-responsive web application for customers and a mobile app for administrators of a food services business. The web application, developed with React.js and TypeScript, offers a food catalogue, cart management, dynamic pricing and verification, a responsive design, and a bilingual interface. The admin mobile app, developed with React Native, provides Clerk authentication, product and category management, order processing, and cross-platform compatibility, with a polished UI built using NativeWind. Both applications use Supabase as the backend, integrated through APIs for dynamic content rendering.

- **Matrix AI Academy | Frontend Developer**

Developed a mobile-responsive web application for online course registration, integrating a React.js frontend with a Supabase backend through APIs for dynamic content rendering. Created user-friendly interfaces for both guests and administrators using Shadcn/ui, and implemented authentication and authorization, dark and light theme switching, and English/Sinhala language switching, with user theme and language preferences saved in localStorage.

EDUCATION

Saegis Campus 2025 - Present

- BEng (Hons) in Software Engineering (results pending)
- Completed Higher National Diploma (HND) in Software Engineering in 2025

St. Joseph's College, Colombo 10 2021 - 2024

- Completed Advanced Level Examinations in 2024
- Completed Ordinary Level Examinations in 2021
