SUMMARY

Innovative and detail-driven Software Engineer with strong problem-solving ability and a product-focused mindset. Experienced in designing and developing scalable digital solutions, integrating modern AI capabilities for smoother delivery. Skilled at understanding client requirements, creating meaningful user experiences, and building systems that are reliable, efficient, and impactful. Committed to continuous learning and delivering high-quality work that adds real value.

TECHNICAL SKILLS

- Programming Languages: JavaScript, C#
- Frontend Development: React.js, Tailwind, Bootstrap, GSAP
- Backend Development: Node.js, Express.js, REST APIs, Supabase
- Databases: MySQL, MongoDB
- DevOps & Deployment: Git, GitHub, Netlify, Vercel
- Tools: ClickUp, ProjectLibre, Figma, Notion, WebStorm, Antigravity, Postman
- Creative & Design: UX Design, Graphic Design, Video Editing, Photography

PROJECTS

WasteXchange Project (Full Stack Developer | MERN Stack)

- Developed a full-stack, mobile-responsive e-commerce web application for Industrial Waste Exchange.
- Features include: Ai Image Classification, Auto Buyers Recommendation, Send Notifications to Correct Buyers, Carbon Dashboard shows savings, Real-Time Bidirectional Messaging, Payment Handling
- Designed and implemented complete CRUD operations for products and order management.
- Developed RESTful APIs using Node.js and Express.js for backend functionality.
- Managed database operations using MongoDB.
- Implemented secure user authentication and authorization using JWT and password hashing.
- Implemented back-end requests sending limit per user for a given time period.
- Version control and collaboration with Git & GitHub.
- **GitHub:**

Matrix Ai Academy Project (Frontend Developer)

- Collaborated with a friend to develop an online course registration-based web application.
- Integrated frontend(React.js) with Supabase(as backend) using APIs for dynamic content rendering.
- Implemented responsive, user-friendly interfaces using shadcn/ui for both guests and admins for seamless cross-device experience.
- Applied component-based architecture to improve UI structure and maintainability.
- **GitHub:**

EDUCATION

Saegis campus

2025 - Present

- BEng (hons) in Software engineering (Pending)
- Completed Higher National Diploma (HND) in Software Engineering in 2025

St.Joseph's College Colombo 10

2024 & 2021

- Completed Advanced Level Exams Successfully in 2024
- Completed Ordinary Level Exams Successfully in 2021
